Product description

"Class B-15 Bulkhead"

Bulkhead assembled by 600 x 2450 mm (width x height) panels consisting of 19 mm thick calcium silicate boards (type Skamol Super Pro 300, density 300 kg/m³) with 0.8 mm laminate (type Polyrey M1 PR) glued to both sides with Skamol Super Pro Glue. The panels were glued together in the joints. Total thickness of panels is 20.6 mm.

Applications/Limitations

Approved for use as a vertical fire retarding division of class B-15.

The insulation material and any surface material used have to be approved according to the Marine Equipment Directive and bear the Mark of Conformity.

Each product is to be supplied with its manual for installation and maintenance.

Type Examination documentation

Test Report PG 11112 Serial No. 8840 dated 25 February 2003 from DIFT, Denmark.

Tested according to IMO FTPC Part 3, IMO Res. A. 754(18).

Marking of product

The product is to be marked with name of manufacturer, type designation, fire technical rating and the Mark of Conformity.

Mark of conformity

The manufacturer is allowed to affix the Mark of Conformity  according to Article 11 in the Council Directive 96/98/EC on marine equipment and issue a Declaration of Conformity, only when the module D or E or F of Annex B in the same directive is fully complied with.

Module D: The quality system for production and testing shall be approved by the Notified Body.

Module E: The quality system for inspection and testing shall be approved by the Notified Body.

Compliance of the products to type as described in this EC Type-Examination Certificate must be verified by the Notified Body who also shall issue a Certificate of Conformity.
